October 2009

We fully endorse Firma Stolarska Majkowski and recommend it to entomologists and entomological institutions.

The Entomology Section in the Department of Biodiversity & Systematic Biology of the National Museum of Wales has purchased insect drawers from Firma Stolarska Majkowski over the past four years for our main insect collection. We have been very pleased with the superior quality of the drawers and the competitive prices.

The company has always provided an excellent service. We have been impressed by the modifications to specifications that have been made to the drawers so that the final product fitted our exact needs.

Dr Michael R. Wilson  
Head of Entomology Section  
Department of Biodiversity & Systematic Biology  
National Museum of Wales  
Cardiff, CF10 3NP, UK
