## Letter of recommendation

When Norwegian Institute of Bioeconomy Research looked for a producer of high-quality insect collection cabinets, drawers, and unit system, we contacted several producers. After being recommended Pracownia Stolarska Marek Majkowski in Krakow we, decided to contact them.

We were impressed by the quality of the products and their professionalism in communication with us as costumers. Since this company has specialised in entomological storage systems of high quality, we believe that this company will survive and deliver cabinets and insect drawers also in the future. We are most pleased by their products and that they delivered the 39 cabinet and 1170 drawers on time. Consequently, we are happy to recommend this company to other professional entomological collections.

Kind regards,  
Yours sincerely

Torstein Kvamme  
Keeper of the entomological  
collection
